Everest View Trek – 8 Days

The destination of our Everest View Trek is situated at the base of Mt. Everest. It takes a 4 days of walk to the Khumbu Valley, where amazing views of Mt. Everest, Nuptse, Lhotse, and Ama Dablam can be witnessed. This vista is possible from the Everest View Hotel, nearby the Khumjung Village. The Everest View Trek is one of the shortest treks in the Everest region. This trek is fairly easy and is especially designed for those who want to see the top of the world in a short period of time. Also called the 'Everest Panorama View Trek', it is a perfect trip for those who want to see the majestic views of Mt. Everest.

Lukla

The journey to the Everest View Trek begins from Lukla, 2828 meters above sea level. This trek is brief and effortless. Along the trek, you will see the most beautiful valleys with impressive views of the Himalayas. You can spot all the neighboring 8000m peaks. The authentic himalayan culture, stunning landscape and traditions of the locals is something that makes for a once-in-a-lifetime experience.

Lukla is a gateway for trekking towards Mt. Everest. The trail in the Sagarmatha National Park has diverse Flora and Fauna. This is an opportunity for travelers to enjoy the beautiful sight of dense pine forests, blooming with Rhododendron flowers.

Namche Bazar

We now reach Namche Bazar to acclimatize ourselves, before we continue on our trek to Tengboche Monastery. Recognized as the highest Buddhist monastery in the Khumbu region, it is considerably the best place for delving into the spiritual pathway. The majority of the locals in the Khumjung region are Sherpas.

March to May and August to November are the best times to trek this region, as the weather conditions are normal and the sky is clear to see the scenery.
